SheetSpeed subprocessors

Product: **SheetSpeed** · Official website: https://sheetspeed.agi-jarvis.com/ · Related: Data Processing Agreement · Privacy Policy

Updated: 19 November 2026. Operator: Philip Dressler, doing business as Dressler Labs, California, USA.

Dressler Labs uses the vendors below in connection with SheetSpeed. Spreadsheet, document and presentation content is not sent to Dressler Labs or to a SheetSpeed server. When a user runs a Pro tool after connecting Google, the browser calls Google's APIs under that user's Google account. Those API calls are listed here for completeness; Dressler Labs does not receive that content and is not the processor of it. See the DPA and Privacy Policy.

We will update this page before a new subprocessor starts processing Customer Personal Data. Under the DPA, customers may object on reasonable data-protection grounds within 30 days after notice.

Current vendors

Vendor	Purpose	Data involved	Location	Vendor terms
Google LLC (Chrome Web Store)	Distributes the SheetSpeed Chrome extension (item `ljlmgielacploapelnjhodicgbjipcaa`) and operates the public store listing. The publisher may also receive Store install or usage statistics.	Install and listing interactions the user has with Google; any aggregate store statistics Google makes available to the publisher. Not spreadsheet content from the extension.	United States and Google's global infrastructure	Google Privacy Policy
Google LLC (Google APIs, Pro tools)	After the user consents, Pro tools call the Google Sheets API, and Refresh from Sheets also calls the Google Slides and Google Drive APIs, directly from the browser. The OAuth client declared in the extension is `289674995985-nel531mer5peurv6dt7e156tl79pj25p.apps.googleusercontent.com`.	Cells, formulas, formatting and related file metadata needed for the tool the user runs; for Refresh from Sheets, the current slide plus a temporary PNG uploaded to the user's own Google Drive. The access token is managed by Chrome and is not sent to Dressler Labs. Dressler Labs does not receive this data.	United States and Google's global infrastructure	Google Privacy Policy · Google Cloud Data Processing Addendum
Google LLC (Google Fonts)	The public website loads the Inter typeface from Google Fonts.	Ordinary website request data, which may include IP address, user-agent and referrer, when a page is viewed.	United States and Google's global infrastructure	Google Privacy Policy · Google Fonts privacy FAQ

Vendor	Purpose	Data involved	Location	Vendor terms
Google LLC (Google Workspace)	Receives and stores support and procurement email sent to jarvis@agi-jarvis.com.	Email addresses, message content, and any attachments the sender chooses to include.	United States and Google's global infrastructure	Google Privacy Policy · Google Cloud Data Processing Addendum
GitHub, Inc. (GitHub Pages)	Hosts the static public website at sheetspeed.agi-jarvis.com, including the origin for sitemap and robots files.	Ordinary website request data (IP address, user-agent, requested URL and similar metadata) when GitHub Pages serves or originates a page or file.	United States and GitHub's infrastructure	GitHub General Privacy Statement · GitHub Data Protection Agreement
Cloudflare, Inc.	DNS, reverse proxy and CDN in front of the website; a Cloudflare Worker serves `/sitemap.xml` and `/robots.txt`; Cloudflare Web Analytics (a beacon on live pages) collects visit metrics.	Request metadata such as IP address, user-agent, requested URL and referrer; Web Analytics visit metrics. No cookies are required for the default Cloudflare Web Analytics beacon, but the request still reaches Cloudflare.	United States and Cloudflare's global edge network	Cloudflare Privacy Policy · Cloudflare Customer DPA · Cloudflare Web Analytics

When paid billing opens

Pro is in early access. This page covers version 0.4.6 r65, the live Chrome Web Store version published 2026-11-19. Version 0.4.6 does not include a billing library, does not collect license, account or payment data, and does not contact a payment processor. Cloudflare Web Analytics remains in use on the website, as listed above.

No billing vendor is a current subprocessor. A license-check service and Stripe would be added only when billing opens, after advance notice under the DPA's 30-day objection window. Card numbers would never reach SheetSpeed. Until that notice is posted, no billing vendor processes Customer Personal Data for SheetSpeed.

Not listed, and why

- **No SheetSpeed application server, and no AI provider** in the Chrome Web Store package.
- **No separate email or form provider.** The site uses a `mailto:` link to jarvis@agi-jarvis.com; the mailbox is Google Workspace, listed above. There is no hosted contact form.
- **No first-party analytics script** in the website source. The only analytics found on the live site is the Cloudflare Web Analytics beacon injected at the edge.
- **Chrome sync storage** is the user's own Chrome profile, if the user enables settings sync. It is not a Dressler Labs subprocessor.
- **SheetSpeed for Excel on Mac** is a separate local app. The Security page states it has no network entitlement. It is not covered as processing under this list.
